

Host Your Own District One-Day Summit Featuring Google Apps in Education

So your district has gone “Google” ...

...and now you are wondering how you are going to immerse your students and staff in this new technology in a systemic way! Let the DigitalBug team at ESD 112 help! We will coordinate your very own District Summit ... Featuring Google Apps in Education!

What does a district summit look like?

Your district's summit will be hosted at one of your schools, eliminating your staff's need to travel to a similar event in the region. Our expert Google Education Trainers will consult with your district instructional and technology leaders to learn about your district's culture, goals, and need for professional development. We will then offer several options to meet your needs, and will design a high-quality, one-day conference experience that will bring Google Apps for Education to life for your staff and that will result in an educational transformation for your district.

What does my district provide for a summit?

In general, your district will provide the following:

- a facility (typically a high school) with a robust wireless network;
- an auditorium or gym for a keynote speaker, and a cafeteria with seating for lunch;
- classrooms for breakout sessions, with projectors and amplification systems;
- a computer lab or Chromebook lab (recommended);
- a hallway or corridor for a vendor showcase;
- your network, IT and AV personnel on the premises;
- adequate parking for the size of conference you wish to offer;
- promotion of the event to your own staff...and if you wish...to staff in nearby districts

What does the DigitalBug program provide for a summit?

We do everything else! Our expert staff will coordinate the entire event for you, which means:

- We'll find just the right presenters and experts to bring in (we're very well networked!);
- We'll organize a vendor showcase which includes DigitalEdge vendors, as well as your favorite vendors, to showcase their Google-related solutions and to offer door prizes;
- We'll promote the event to other districts (if you choose) through news blasts and social media;
- We'll provide registration and clock hours (if desired), name badges on lanyards, presenter shirts, and door prizes...all of the hallmarks of a fun, educational GAFE summit! *And...*
- Of course ... we'll create your very own custom summit web site and social media presence for your event!

Minimum participation	100 paid participants	100 participants
Registration details	<ul style="list-style-type: none">• DigitalBug handles registration/collects fees• DigitalBug offers clock hours if desired	<ul style="list-style-type: none">• District handles registration and collects fees• District offers clock hours if desired
Pricing	<ul style="list-style-type: none">• Early Bird registration - \$135 per person• Regular registration - \$150 per person• DigitalBug provides 10 free registrations for every 100 paid participants.	<ul style="list-style-type: none">• 100-250 participants: \$18,000• 251-500 participants: \$27,000• 501-800 participants: \$30,000

Optional Pre-Summit Institute

Want more learning opportunities? Add a Pre-Summit Institute. Our Google Certified specialists will run a hands-on session 3-4 hours long the night before the summit. Several options are available, including “boot camps” to get your staff started with Google or help prepare those who are seeking certification. Options include:

Google Educator Quickstart
Google Education Trainer Quickstart

Google Certified Administrator Quickstart
Chromebook Boot Camp

This special event is limited to 30 participants. Your district can choose one session with two instructors to maximize personalized instruction, or two sessions with one instructor each to maximize the number of participants.

Additional Cost: \$180 per participant
